

Banner Display System

The NEW **Slotted Banner Hanging System** is being well received by the display industry for the displaying of one or two sided images. The images can be laminated or simply slipped into the banner un-laminated after attaching the adhesive grip strip to the top and bottom. You can also slide mounted card stock, millboard, mat board or laminated prints into the slot using heavy industrial type staples on the edge of the material you are hanging.

The unique slot and end cap system permits you, with simple tools:

- to cut the banner rod to the correct length with a simple hand saw
- attach the adhesive strips to the image, **or** instead of using adhesive strips, use the Rapid HD31 or Rapid # 35 stapler to insert a series of staples across the top of the print or banner
- slide the image into the slotted rod
- slide the hanging hooks into the rod
- finish off the rod by slipping the end caps over each end of the rod.

Item No.	Description	Wholesale Cost
26585	Adhesive Grip Strips 4 ft long	\$ 1.00
26595	Small black Hanging Hooks 100/bag	\$ 8.00
26612	Black End caps for Dowel 50/bag	\$ 19.00
26615	Slotted Black 1" diameter dowel, 8 ft lengths	\$ 7.50

The cost for the shop to do a 24" wide x 36" high banner with a dowel across the top and along the bottom would be approximately \$6.00. You can do the cutting and assembling for your customer or you can let your customer do it.
